PROFESSIONAL SUMMARY

Backend Developer with 4+ years of experience building backend systems and web applications from the ground up, including business applications and content management systems (CMS), using PHP and Laravel. Experienced in RESTful API development, database design and query optimization, authentication and authorization, background processing, and third-party integrations. Hands-on experience integrating AI-powered document processing, payment gateways, messaging and email services, and video delivery, alongside automated testing, CI/CD, and production deployments. Focused on secure, maintainable backend systems and reliable application performance.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Elevenz
Jan 2026 – Present

- Contribute to the ongoing development of an enterprise CRM system, focusing on backend development, API-driven workflows, and business logic while supporting frontend development using Laravel, Vue.js, and MySQL/MariaDB.
- Improve application architecture, maintainability, and overall system performance through code refactoring, database optimization, and API performance improvements
- Develop and integrate advanced system capabilities, including AI-powered business workflows and third-party service integrations.
- Contribute to application quality and reliability through automated testing, troubleshooting, and production deployment using Laravel Forge and Cloudflare.

Back-End Developer (Part-Time, Remote) | ProFly Educational Platform
Feb 2026 – Oct 2026

- Built the backend of an educational platform from the ground up using Laravel and Livewire, establishing its core architecture, business logic, and application workflows.
- Developed core platform capabilities supporting multiple user roles, administrative dashboards, educational activities, and learning content management.
- Designed and integrated essential platform services, including payment solutions, communication services, AI-powered capabilities, and video delivery.
- Established the platform's testing, CI/CD, and production deployment workflows using GitHub Actions, Laravel Forge, and Cloudflare.

Freelance Back-End Developer | Tunis International Trading Company
Oct 2025 – Dec 2025

- Configured, customized, tested, and deployed a Bagisto-based e-commerce platform for an automotive spare parts business.

Freelance Back-End Developer | Benaa Organization
Aug 2025 – Sep 2025

- Built a Laravel and Livewire administrative dashboard with secure REST APIs, role-based access control, database optimization, and AI model integration using prompt engineering.

Freelance Back-End Developer | Arab Builders Holding
May 2025 – Jun 2025

- Developed Laravel backend APIs and contributed to website performance improvements and SEO.

Mid-Level Back-End Developer | Walsl Afaq
Nov 2024 – Jun 2025

- Led backend and API development for multiple web applications and delivered administrative dashboards using React, Inertia.js, and Livewire.
- Integrated Stripe payment processing and mentored junior developers to improve code quality and development practices.

Back-End Developer | Walsl Afaq
Oct 2023 – Oct 2024

- Delivered five end-to-end Laravel websites and implemented role-based access control in administrative panels.

Teaching Assistant | Saba University
Jan 2024 – May 2024

- Taught Laravel fundamentals, including MVC, routing, Blade, Eloquent, and authentication, and mentored students on Laravel-based graduation projects.

Teaching Assistant | Al-Razi University
Sep 2023 – Jan 2024

- Taught C++ fundamentals and supported practical programming exercises to strengthen students' coding and problem-solving skills.

Junior Back-End Developer | Walsl Afaq
Oct 2022 – Sep 2023

- Improved Laravel/MySQL database architecture, increasing query efficiency by 23%; developed 40+ Laravel REST APIs; and optimized SQL queries and indexing to reduce reporting and data retrieval time by up to 33%.

Junior Back-End Developer | Al-Basha Com
Jul 2022 – Oct 2022

- Took over software development and maintenance from an outsourced team, helping reduce outsourcing costs by more than 60% and streamline maintenance and releases.

SELECTED PROJECTS

Elevenz CRM
Developed an AI-powered quotation import feature using OpenRouter to analyze PDF, Word, and Excel documents, including scanned PDFs through OCR. Extracted information is processed through background jobs to help populate quotation forms.
Technologies: Laravel, PHP, Vue.js, MySQL, MariaDB, OpenRouter, OCR, Queues & Jobs

ProFly Educational Platform | 2026 | Website: profly.tech
An educational platform supporting four account types: students, parents, career mentors, and schools or organizations. The platform includes four role-based dashboards, educational activities, and learning content management.
Technologies: Laravel, Livewire, MySQL

Yemen TV Channel SMS Competition System
Built a Laravel administrative dashboard for SMS-based competitions, handling more than six million records and supporting reporting, filtering, participant draws, and winner management.
Technologies: Laravel, PHP, MySQL

MaskAPI Platform
Developed a SaaS platform using Laravel and Next.js that enables developers to customize API response formats, with an administrative panel for backend management.
Technologies: Laravel, PHP, Next.js, REST APIs

Automotive Spare Parts E-commerce Platform
Configured, customized, tested, and deployed a Bagisto-based e-commerce platform for an automotive spare parts business.
Technologies: Laravel, Bagisto, Vue.js

Additional Projects: Arab Builders Website | Al-Thawrah ad publishing and order workflows | Orient CMS and job applications | LightNas Pharma website and admin dashboard

TECHNICAL SKILLS

Backend Development & APIs: PHP, Laravel, RESTful APIs, Eloquent ORM, Livewire, Inertia.js, Laravel Sanctum, JWT Authentication, Laravel Socialite, Laravel Telescope, Filament, Background Jobs & Queues.

Databases & Performance: MySQL, MariaDB, SQL Server, PostgreSQL, SQLite, Redis, SQL Optimization, Database Indexing, Query Optimization, Eloquent ORM, Prisma ORM.

AI & Integrations: OpenRouter, LLM API Integration, Prompt Engineering, AI-Powered Workflow Integration, Document Processing, OCR, AI Assistant Integration, Text-to-Speech, Moyasar, Tabby, Tamara, Stripe, SMS and Email Services, Cloudflare Stream, Invoice and QR Code Generation.

Testing & Quality Assurance: PHPUnit, Laravel Unit Testing, Feature Testing, REST API Testing, Debugging, Performance Testing.

DevOps & Deployment: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker, Laravel Forge, Cloudflare, Server Deployment, Domain Configuration.

Architecture & Engineering: Object-Oriented Programming (OOP), SOLID, Design Patterns, Clean Architecture, MVC, Application Refactoring, Performance Optimization.

Additional Frontend: Vue.js, JavaScript (ES6+), Tailwind CSS, React.js, Next.js, TypeScript, HTML5, CSS3, Laravel Blade, Bootstrap.

Project Management: Agile, Scrum, ClickUp, Slack, Technical Documentation, Problem-Solving, Team Collaboration.

EDUCATION

Bachelor of Information Technology | Al-Razi University | September 2018 – June 2022 | GPA: 96

LANGUAGES

Arabic: Native | English: Intermediate
