PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building, maintaining, and optimizing web applications and platforms, including business applications and content management systems (CMS). With a strong focus on backend engineering using PHP and Laravel, experienced in RESTful API development, application architecture, database design and optimization, and third-party integrations. Also experienced in frontend development using Vue.js, JavaScript, and Tailwind CSS, alongside AI-powered integrations, automated testing, CI/CD, and production deployments. Focused on building reliable, maintainable, and scalable software.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Elevenz — Jan 2026 – Present

- Contribute to the ongoing development of an enterprise CRM system, handling both frontend and backend development, from implementing business requirements to delivering new features using Laravel, Vue.js, and MySQL/MariaDB.
- Improve application architecture, maintainability, and overall system performance through code refactoring, database optimization, and API performance improvements.
- Develop and integrate advanced system capabilities, including AI-powered business workflows and third-party service integrations.
- Contribute to application quality and reliability through automated testing, troubleshooting, and production deployment using Laravel Forge and Cloudflare.

Back-End Developer (Part-Time, Remote) | ProFly Educational Platform — Feb 2026 – Oct 2026

- Built the platform's backend from the ground up using Laravel and Livewire, establishing its core architecture and business workflows.
- Developed platform capabilities supporting multiple user roles, dashboards, educational activities, and learning content management.
- Integrated essential external services, including payment gateways, communication platforms, AI-powered capabilities, and video streaming solutions.
- Established testing, CI/CD, and production deployment workflows using GitHub Actions, Laravel Forge, and Cloudflare.

Freelance Back-End Developer | Tunis International Trading Company — Oct 2025 – Dec 2025

- Configured, customized, redesigned, tested, and deployed a Bagisto-based e-commerce platform for an automotive spare parts business.

Freelance Back-End Developer | Benaa Organization — Aug 2025 – Sep 2025

- Built a Laravel and Livewire administrative dashboard with secure REST APIs, role-based access control, database optimizations, and AI model integration using prompt engineering.

Freelance Back-End Developer | Arab Builders Holding — May 2025 – Jun 2025

- Developed Laravel backend APIs, supported frontend development using Tailwind CSS, and contributed to website performance and SEO improvements.

Mid-Level Back-End Developer | Walsl Afaq — Nov 2024 – Jun 2025

- Delivered multiple administrative dashboards using React, Inertia.js, and Livewire, and led backend and API development for multiple web applications.
- Integrated Stripe payment processing and mentored junior developers to improve code quality and development practices.

Back-End Developer | Walsl Afaq — Oct 2023 – Oct 2024

- Delivered five end-to-end Laravel websites and implemented role-based access control in administrative panels.

Teaching Assistant | Saba University — Jan 2024 – May 2024

- Taught Laravel fundamentals, including MVC, routing, Blade, Eloquent, and authentication, and mentored students on Laravel-based graduation projects.

Teaching Assistant | Al-Razi University — Sep 2023 – Jan 2024

- Taught C++ fundamentals and supported practical programming exercises to strengthen students' coding and problem-solving skills.

Junior Back-End Developer | Walsl Afaq — Oct 2022 – Sep 2023

- Improved Laravel/MySQL database architecture, increasing query efficiency by 23%, developed 40+ Laravel REST APIs, and optimized SQL queries and indexing to reduce reporting and data retrieval time by up to 33%.

Junior Back-End Developer | Al-Basha Com — Jul 2022 – Oct 2022

- Took over software development and maintenance responsibilities from an outsourced team, helping reduce outsourcing costs by more than 60% and streamline maintenance and release workflows.

SELECTED PROJECTS

ProFly Educational Platform | 2026 | Website: profly.tech

An educational platform supporting four account types: students, parents, career mentors, and schools or organizations. Implemented four role-based dashboards, educational activities, and learning content management to support the platform's core learning workflows.
Technologies: Laravel, Livewire, MySQL

Elevenz CRM

Contributed to an enterprise CRM platform by developing an AI-powered quotation import feature using OpenRouter. The feature analyzes PDF, Word, and Excel documents, supports OCR for scanned PDFs, and processes extracted information through background jobs to populate quotation forms.
Technologies: Laravel, PHP, Vue.js, Tailwind CSS, MySQL, MariaDB, OpenRouter, OCR, Queues & Jobs

Automotive Spare Parts E-commerce Platform

Configured, customized, redesigned, tested, and deployed a Bagisto-based e-commerce platform for an automotive spare parts business.
Technologies: Laravel, Bagisto, Vue.js

Yemen TV Channel SMS Competition System

Built a Laravel administrative dashboard for SMS-based competitions, handling more than six million records and supporting reporting, filtering, participant draws, and winner management.
Technologies: Laravel, PHP, MySQL

MaskAPI Platform

Developed a SaaS platform using Laravel and Next.js that enables developers to customize API response formats, with an administrative panel for backend management.
Technologies: Laravel, PHP, Next.js, REST APIs

Additional Projects: Arab Builders corporate website | Al-Thawrah ad publishing and order workflows | Orient CMS and job applications | LightNas Pharma website and admin dashboard

TECHNICAL SKILLS

Backend Development: PHP, Laravel, RESTful APIs, Eloquent ORM, Livewire, Inertia.js, Laravel Sanctum, JWT Authentication, Laravel Socialite, Laravel Telescope, Filament, Background Jobs & Queues.

Frontend Development: Vue.js, React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Laravel Blade, Bootstrap.

AI & Automation: OpenRouter, LLM API Integration, Prompt Engineering, AI-Powered Workflow Integration, Document Processing, OCR Integration, AI Assistant Integration, Text-to-Speech Integration.

Databases & ORM: MySQL, MariaDB, SQL Server, PostgreSQL, SQLite, Redis, SQL Optimization, Database Indexing, Eloquent ORM, Prisma ORM.

Payment & Third-Party Integrations: Moyasar, Tabby, Tamara, Stripe, SMS Gateway Integration, Email Services, Cloudflare Stream, Invoice and QR Code Generation.

Testing & Quality Assurance: PHPUnit, Laravel Unit Testing, Feature Testing, REST API Testing, Debugging, Performance Testing.

DevOps & Deployment: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker, Laravel Forge, Cloudflare, Server Deployment, Domain Configuration.

Architecture & Engineering Principles: OOP, SOLID, Design Patterns, Clean Architecture, MVC, MVVM, Application Refactoring, Performance Optimization.

Project Management & Collaboration: Agile, Scrum, ClickUp, Slack, Technical Documentation, Problem-Solving, Team Collaboration.

EDUCATION

Bachelor of Information Technology | Al-Razi University | September 2018 – June 2022 | GPA: 96

LANGUAGES

Arabic: Native | English: Intermediate
